

MAFCSE Member Spotlight

Kim Knoche

Kim Knoche, Family & Consumer Sciences Teacher and FCCLA Adviser in Forsyth, has been actively working to keep her program and students up to date on the latest technology and industry trends. Her work has not gone unnoticed, and her program has received recognition for Montana's ACTE Innovative Career & Technical Education Program and she is our MAFCSE Member Spotlight!

Kim challenges the students in her classes by keeping them on the cutting edge of technology and continuously updates her curriculum in innovative ways. Her Child Development and Culinary classes have the opportunity to utilize CAD and 3-D Printers to create objects to accomplish goals in these content areas. The Child Development classes created personal bubble wands for toddlers and the culinary classes created pasta measuring and serving tools. Kim and her innovative program will earn some much-deserved recognition this spring at the Region V ACTE Conference in Rapid City, South Dakota.
